

Bhavana Pillai - Software Developer

bhavanapillai.100@gmail.com | India | LinkedIn | LeetCode | Github | Blogs

SUMMARY

Collaborative Software Developer with a strong foundation in full-stack engineering and a genuine love for deep debugging. I build secure, user-centric APIs (Python, FastAPI, JS) while using AI to streamline my workflows, ensuring I can invest deeply in technical design and team feedback.

PROFESSIONAL EXPERIENCE

Ithena Technologies

Software Developer

05/2025 – Present
Baner, Pune

- **Technical Leadership & Ownership:** Stepped into the Technical Lead role for a core project, managing 100% of the zero-to-one development lifecycle and driving foundational architectural strategy from scratch.
- **Client Requirement Engineering:** Conducted requirement-gathering sessions directly with key client stakeholders, translating 10+ complex business use cases into precise, secure technical specifications.
- **Architectural Documentation:** Authored 15+ comprehensive technical architecture documents and API schemas, establishing engineering standards that reduced team context-switching and improved code consistency.
- **Rapid Tool Adoption & Delivery:** Mastered the Frappe framework within 2 weeks, building and shipping core application modules while maintaining strict system security and user experience standards.

Associate Software Developer

05/2025 – 04/2026
Baner, Pune

- **Engineered and shipped 4+ independent production modules**—including Carousel Andon Dashboards, User Management systems, and Alert Simulators—improving real-time data visibility and workflow efficiency for end-users.
- **Integrated advanced IIoT workflows (Ignition, ThingsBoard) and ML models (Prophet AI)** to build predictive telemetry forecasting systems, enabling automated anomaly detection across live industrial data streams.
- **Sustained 98% system uptime across 15+ production releases**, earning 3 consecutive "Pat on the Back" awards for deployment excellence, reliable delivery, and high code quality.
- **Championed technical growth across engineering teams** by leading knowledge-sharing presentations on API Security and system architecture during company-wide iShare sessions reaching 40+ colleagues.

SKILLS

Languages

Proficient in Javascript, Python, HTML, Go (Basics)

Libraries/Frameworks

ReactJs, NextJs, Vue, Angular, Node, Tailwind, FastAPI

Databases

MySQL, MongoDB
PostgreSQL(PrismaORM)

DevTools

Git, Postman, Linux(SSh), AWS EC2, Docker

AI/ML & DATA

LLMs, Codex, OpenAI, Hugging Face, Claude Code

Soft Skills

Flexibility, Mentorship, Technical Documentation

EDUCATION

Zeal College of Engineering and Research

B.E in Computer Engineering- 8.19 CGPA

12/2021 – 06/2025
Pune

PROJECTS

ARTIST PORTFOLIO

(Next.js, MongoDB, Tailwind CSS, REST API, Vercel)

KEY FEATURES:

- Built a modern, responsive portfolio interface with dynamic product and artwork management.
- Developed secure CRUD functionality enabling independent content updates by the artist.
- Ensured real-time UI updates and seamless data handling across components

SECURE ENTERPRISE POLICY INTELLIGENCE PLATFORM

(Python, PyPDF, SentenceTransformers, FAISS, LLaMA)

KEY FEATURES:

- Built a PDF ingestion and preprocessing pipeline with PyPDF, cleaning formatting and hyphen-breaks.
- Implemented **semantic chunking** and **SentenceTransformers** to maintain context and generate high-dimensional embeddings for superior retrieval
- Used **FAISS** and **cosine similarity** to enable low-latency semantic search across large document corpuses, utilizing **PKL** for efficient storage.

WEB EMAIL SCRAPER

(Go, Goroutines, net/http)

KEY FEATURES:

- Engineered a high-performance web scraper to systematically parse and extract email data from target web pages.
- Implemented an optimized concurrency model utilizing worker pools, successfully reducing data extraction time from 10-15 seconds to 3-4 seconds.
- Designed robust error handling and network request management to ensure reliable data processing.

CERTIFICATES

Kaggle

Intro to Machine Learning,
Intermediate Machine Learning

HackerRank

4-Star In Python, 4-Star in
Problem Solving, 5-Star in SQL

IBM

Data Science Landscape
Certificate, Introduction to Data
concepts

ACHIEVEMENTS

Invited Speaker — The API Community

Invited as a featured speaker for the *Backend Series*, presenting technical sessions on API security best practices and backend production architecture to developer audiences.

Triple 'Pat on the Back' Award Recipient

- Recognized thrice at Ithena Technologies for consistent technical excellence, proactive problem-solving, and supporting team objectives during production deployments.

GSsoc Extended

- Contributed to 4 global open-source projects, focusing on **Responsive Web Design**, **User Experience (UX)**, and collaborative version control using **Git**.
